- Care for others

IS STRESS BAD?

- Stress can have negative effects on the body however some stress can be good for you
 - What type of positive things can still elicit stress?
 - Although some things are positive, it still activates a stress response in your body
- Stress is like your body temperature – it can get too high or too low
- Use stress energy in a positive way to meet life's experiences and goals

GOOD STRESS

- Stress can be good for you if you find the right balance. With the right outlook, stress can keep you going strong.
- Positive stress can make life both rich and satisfying.

THE MIND-BODY CONNECTION

- Your mind and body are connected
- When your mind is healthy, you are able to resist illnesses better
- When your body is healthy, your feelings are more positive

CHANGE YOUR MIND ABOUT STRESS CHANGE YOUR BODY'S RESPONSE

Tell myself the truth about stress

- Stress is helpful, can be good, etc.

Re-frame stress response: Stress response is preparing my body to overcome a challenge.

- Increased Heart Rate is preparing my body for action
- Increased Respirations is increasing oxygen to my brain
- Increased Muscle Tension is preparing body for movement

CONNECTING AND CARING FOR OTHERS

Connecting with others is a key component to reducing stress

- Develop a support system
- Have outlets to discuss daily stressors

Caring for others can be a stress management tool- it creates resiliency

- Volunteer work
- Teaching or coaching activities
